

Education and Brain Sciences Research Laboratory

is now recruiting for a study investigating

Brain-Based Learning Enhancement

Adults between the ages of 18-40 who are native English speakers are invited to participate.

The study includes:

- Initial eligibility screening
- 3-4 study visits
 - Visit 1 includes: MRI, EEG, non-invasive brain stimulation and behavioral testing
 - Visits 2 and 3 include: non-invasive brain stimulation session, and behavioral testing. Some individuals may be asked to complete an EEG.
 - Some participants may be invited for a Visit 4 which includes: MRI, EEG, and behavioral testing

For participating, you will receive:

- E-gift card for \$50 for each study visit, plus a \$50 completion bonus for finishing all parts of the study
